

FIG 1

APPROVED	O.G. FIG.	
BY	CLASS	SUBJECT
DRAFTSMAN		

A cross-sectional view of a device 10. It consists of a top layer 12, a middle layer 14, and a bottom layer 16. A central core 30 is shown with a wavy interface 32 between it and the middle layer 14. A dashed line 34 indicates a boundary within the middle layer 14. A central feature 36 is located within the core 30. A layer 38 is positioned below the middle layer 14. A central feature 40 is located within the bottom layer 16. A layer 42 is positioned above the middle layer 14. A central feature 44 is located within the top layer 12. A dashed line 46 indicates a boundary within the top layer 12. A central feature 48 is located within the top layer 12. A central feature 50 is located within the top layer 12. A central feature 52 is located within the top layer 12. A central feature 54 is located within the top layer 12. A central feature 56 is located within the top layer 12. A central feature 58 is located within the top layer 12. A central feature 60 is located within the top layer 12. A central feature 62 is located within the top layer 12. A central feature 64 is located within the top layer 12. A central feature 66 is located within the top layer 12. A central feature 68 is located within the top layer 12. A central feature 70 is located within the top layer 12. A central feature 72 is located within the top layer 12. A central feature 74 is located within the top layer 12. A central feature 76 is located within the top layer 12. A central feature 78 is located within the top layer 12. A central feature 80 is located within the top layer 12. A central feature 82 is located within the top layer 12. A central feature 84 is located within the top layer 12. A central feature 86 is located within the top layer 12. A central feature 88 is located within the top layer 12. A central feature 90 is located within the top layer 12. A central feature 92 is located within the top layer 12. A central feature 94 is located within the top layer 12. A central feature 96 is located within the top layer 12. A central feature 98 is located within the top layer 12. A central feature 100 is located within the top layer 12.
